## PROJECTS

### BookingsAfrica — ([Site](#), [Android App](#), [iOS App](#))

ReactJS + NextJS, React-Native, Redux, NodeJS (Under Development)

Bookingsafrica.com is a Pan African online marketplace that enables digital work physically & virtually. We facilitate seamless transactions between service providers, agencies and consumers from sourcing to payment in a way that is safe, transparent and cost effective for all users.

### Lordhair— ([Site](#))

ReactJS, Magento 2, GraphQL (Under Development)

Lordhair is an online retailer of hyper-realistic hair systems, hairpieces, toupees, wigs, and integration solutions. It provides wigs and hair solutions for Men, women and children. Also you can customize your wig as you want as it has customized your product option.

### Trade and Go— ([Site](#))

ReactJS + NextJS, Redux

Trade and go is an Artificial intelligence based forex trading platform. Users can register with his broker account. Users can see the real time candle chart for the currencies and also there is custom AI based singling part from which they can book his maximum profit.

### EudaMed Scan— ([Android App](#), [iOS App](#))

React-Native

EUDAMED is the medical device database for the European Commission. You scan the human-readable string on a medical device label OR search using an individual UDI DI on screen/paper. It'll scan the code and show the Manufacturer details of the product.

### SafariBank— ([iOS App](#))

React-Native, Redux

This is a full loan finance service at your fingertips with a super easy-to-use loan application interface featuring sliders to help you choose your loan amount and term. You get a decision in principle within minutes. Once approved you can access your finance within 24 hours.

### Roku POC

Roku, BrightScript

Roku POC includes Markup list, Rowlist and Video Player functionality. This POC channel has some videos and a detailed page of videos. Also it has settings for changing the background of the channel.

### Reusable Components

ReactJS, Redux

Reusable components have some basic common components (form, input, button, etc.) for projects which can be used in other projects directly. It also includes some auth flows with implementation with API and social auth, which can be used in other projects directly.
